INPATIENT REHABILITATION
SERVICES

A national study shows that patients treated at medical rehabilitation hospitals for disabling injuries or illnesses achieve **better results in shorter amounts of time and improve their quality of life** compared to those treated in skilled nursing facilities.

On average, patients:

- Return home **two weeks** sooner
- Remain home nearly **two months** longer without additional outpatient services
- Have **fewer hospital readmissions and ER visits**
- Live nearly **two months** longer

The study, which was conducted by Dobson DaVanzo & Associates, compared more than 100,000 medically and demographically similar patients in medical rehabilitation hospitals to skilled nursing facilities during a period of two years.
