

Rehabilitation

AND COVID-19 RECOVERY

Patients hospitalized with Covid-19 may benefit from inpatient rehabilitation provided at ClearSky Rehabilitation Hospital of Leesville.

We provide our patients with specialized rehabilitative care to address long-term effects associated with Covid-19, including:

- Muscle fatigue, weakness, and damage
- Mobility issues
- Fine motor skills
- Cognitive impairments, including memory, attention, reasoning, & problem-solving impairments
- Impulsiveness and agitation
- Decreased respiratory function
- Complications such as septic shock, myopathy, neuropathy, and/or acute respiratory distress syndrome

Our physician-led, interdisciplinary team provides carefully coordinated, individualized care, including:

- 24-hour rehabilitation nursing care
- Physical, occupational, and/or speech therapy a minimum of 15 hours a week
- On-site respiratory care
- Consistent intervention assessments and monitoring of VS, IVFs/antibiotics, ostomy, catheter, tracheotomy, NG care

Upon discharge, we help arrange outpatient therapy, follow-up physician appointments, or home health. We supply educational information on continued exercises, behavior modifications, home modifications, and assistive devices, if necessary.

Our goal is to help our patients return to their previous cognitive and physical abilities after experiencing Covid-19.
