

INPATIENT REHABILITATION HOSPITALS RECOMMENDED FOR

Post-Stroke Care

Please Call

TO LEARN MORE ABOUT OUR
STROKE SERVICES

Inpatient rehabilitation hospitals are the recommended post-acute venue for stroke survivors by the American Heart Association/American Stroke Association (AHA/ASA).

The AHA/ASA recommends that immediately following acute-care stays, stroke patients receive rehabilitation treatment at an inpatient rehabilitation facility, rather than a skilled nursing facility. At an inpatient facility, services are delivered by a multidisciplinary team of experience healthcare providers.

Evidences shows that dedicated, inter-professional stroke care may:

- Reduce mortality rates
- Lessen the likelihood of institutional care
- Decrease long-term disability
- Enhance recovery
- Increase independence with activities of daily living
