

ER & URGENT CARE

Referrals

ClearSky Rehabilitation Hospital of Rio Rancho, a post-acute rehabilitation hospital, offers an alternative for patients who don't meet admission criteria for acute care and are unable to return home safely. Patients are not required to have a 3-night hospital stay.

Patients who qualify may include those with:

- Inoperable pelvic fractures
- Other injuries that have caused functional limitations
- Acute or late-effect strokes with deficits
- Parkinson's disease exacerbations
- Multiple sclerosis exacerbations

Please provide the following information upon referral:

- Patient demographic and payer information
- Diagnosis, labs, X-rays, and other diagnostic tests
- ED summary
- Any restrictions or weight-bearing precautions
- Evaluation of patient's level of function, by a RN or therapist if available

Patients must meet medical necessity and have a therapy need for inpatient hospitalization.
