

SPINAL CORD INJURIES

Rehabilitative Intervention

For someone who has experienced a spinal cord injury, early intervention through rehabilitation can help prevent further disability and reduce the possibility of complications.

At **ClearSky Rehabilitation Hospital of Rio Rancho**, our goal is to provide the highest quality of life possible following a spinal cord injury. Our interdisciplinary healthcare team works with patients and family members to create individualized treatment plans, allowing patients to maximize recovery so they can return to active and productive lives.

Our coordinated treatments enhance a patient's physical, emotional, and social abilities. We focus on preventing further injury, while improving sensory and motor functions.

Treatments include (as appropriate):

- Physical Therapy
- Occupational Therapy
- Speech Therapy
- Dysphagia Management
- Assistive Technology
- Neurogenic Bowel & Bladder Management
- Respiratory Therapy
- Family & Caregiver Education
- Home Evaluations
- Case Management
