

Not All Rehabilitation IS THE SAME

Rehabilitation services provided in other settings can't match the higher level of care found at medical rehabilitation hospitals.

Medical rehabilitation hospitals are required to:

- Be licensed and accredited
- Use an interdisciplinary team approach to care
- Have a physician with specialized rehabilitation training supervise medical services
- Provide rehabilitative nursing 24/7
- Offer patients therapy for a minimum of 15 hours a week

At **ClearSky Rehabilitation Hospital of Rio Rancho**, patients interact and set individual goals with an interdisciplinary team that includes a physician, along with specially trained healthcare professionals in physical, occupational, and speech therapy; rehabilitative nursing; case management; respiratory therapy; dietary services; and other specialized services.
